OPTIMAL DIGITAL TRANSFORMATION GROUP, LLC (ODTG)

Workflow & Operational Improvement Advisory — Capability Statement

SBA-Certified SDVOSB · WOSB · VOSB

Optimal Digital Transformation Group, LLC (ODTG) is an SBA-certified Service-Disabled Veteran-Owned, Woman-Owned, and Veteran-Owned Small Business. We help federal agencies and growing organizations see how work actually flows: we map the current state, find the bottlenecks, redesign the workflow, and measure what improved.

CORE SERVICES

- **Workflow Analysis & Redesign** — process modeling and workflow mapping to document how work moves today, find where it breaks, and design a better future state.
- **Process Improvement** — reducing unnecessary steps, duplication, delays, and handoff problems so teams spend time on the work, not the workaround.
- **Records & Information Management** — file plans, paper-to-digital conversion, indexing, and records compliance for regulated operations.
- **Operations & Program Advisory** — business analysis of how people, processes, and systems interact, plus planning and monitoring so change actually sticks.

Specialized capabilities: business analysis, process modeling, SOP and process documentation, performance measurement, training development, and Section 508 accessibility compliance.

FOUNDER'S PAST PERFORMANCE

Delivered through Norton Electronic Information Management, Inc., an SBA 8(a)-certified federal records management firm led by ODTG's founder for 18 years:

- **Florida Department of Health** — trained agency staff to convert vital statistics records from paper to PDF.
- **State of Tennessee Emergency Management Agency (TEMA)** — records management services.
- **TGH (healthcare third-party administrator)** — HCFA 1500 claims processing to ISO standards.

DIFFERENTIATORS

- **SBA-certified SDVOSB** — eligible for service-disabled veteran set-aside and sole-source awards; also WOSB and VOSB certified.
- **18 years leading an 8(a)-certified federal firm** — we understand federal compliance from the inside, not from a textbook.
- **Credentialed methodology** — PSM I (Professional Scrum Master I); graduate certificate in project management, UMGC (begins October 2026).
